#### HENRY FORD'S DEFINITION.

"Radicals and conservatives, who are markedly such, constitute small portions of the nation and check each other," declares Henry Ford, "They are, as it were, the advance guard and the rear guard of progress. Radicalism is wrong when it is jealous and conservatism is wrong when it is greedy, No one will say that to challenge the injustices of the present system is wrong and no one will say that to defend established linjustice because it is established, a right. Society itself is peither conservative or radical—it just grows along with enough of radicalism to keep it going and enough of conservatism to prevent it from becoming a monstrosity. If these two parties could realize their relative smallness and study their soicial functions, they would see that progress does not depend

on converting the world to either point of view. Henry Ford is the most successful business man time has known. He has a philosophy all his own. He was a wage earner twenty-three years ago. At that time he was taking down twenty-five dollars a week and lived in a four-roomed house. Now he has a each bark account of \$246,000,000, he has plants and stocks of raw materials which inventory \$650,000, | mred. 000, and his railroads, coal mines, glass factories, steel mills and TOO MUCH ACID IN Hen's egg was found in a Lake vast tracts of timber and yet he is neither a reactionary nor a radical

His viewpoint is certainly interesting. His theory is that radicalism curbs creed and that conservatism curbs radicalism. When all the world is prosperous and each human atom has a little slice of prosperity the world jogs along in a merry old ne men have hard luck. So way. Otherwise, otherwise,

YOUR MONEY Where Does It Go?

Where Does it Go?

IF you expect to succeed, know the direction your money travels. Some one lanks it. Some one invests it and makes more. Why not you? WHEN your money leaves your hand, what kind of a receipt do you get for it? One receipt at least, should be a payment on a good piece of land. Save a little as you ge, and trade your receipts for a title to some property.

BUT, you must look in the right place if you expect to find a good investment and sectalty.

THE great real estate question where? We can answer it. In the 10 years we have been selling property, we have yet to find the first man who has ever lost a cent on anything bought through this office, on the other hand most all have made and are making hig profits.

AS NEAR as we can make out, there are "57" kinds of suburban divisions and sublivisions on the market. Look them all over study their locations, see what kind of land, water, streats, etc., they have to wrier, and especially the location.

YOU will find "The Groves" is In the center of "everywhere," near the New Atlantic Refinery, near the New Atlantic Refinery, near the New Atlantic Refinery on Fort Nechels, six 10-year-old pecan trees to a lot. 5 miles of streets just graded and regraded, more to be done and streets to be shelled, soon to have about a fire one and streats to be shelled, soon to have about a fire one and lights. For a home or investment it can't be beat. "The Groves is your best buy" Select a lot or two new before all the most desirable ones are gone, \$25 down. Sto per month. Save and succeed. Don't stay behind the game all your life. Come in make a start—the rest is easy. Get ahend.
